Look for the Green Loop Guide

A speedy and highly efficient chain hoist. Built in capacities from ¼ to 20 tons.

CHAIN HOISTS

Ford Tribloc Hoists

Shackles which have important advantages o

SOME ADVAN

"Ezeejoin" Ball

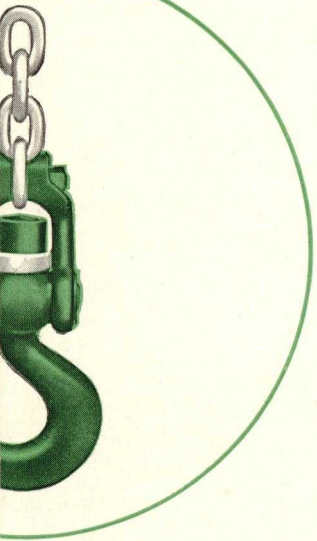
1. Permits easy swiveling of Hook.
2. Quick and easy to connect chain and Shackle.
3. No Chain welding.
4. Eliminates the difficulty of poor welding when done by inexperienced blacksmiths.

WRITE FOR CATA

are equipped with "Ezeejoin" Ball Bearing

ver the old-style hook and crosshead.

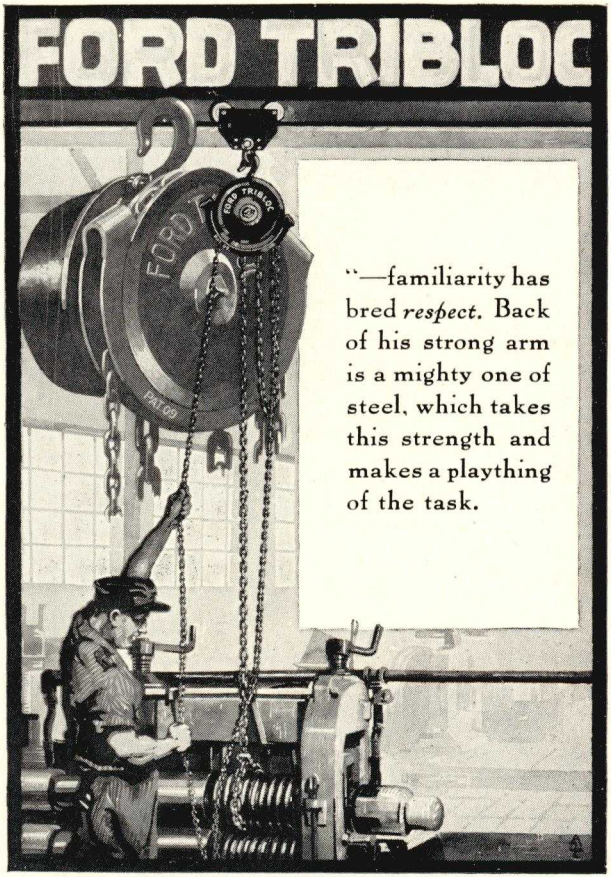
TAGES OF THE
Bearing SHACKLE



5. Made of Drop Forged Steel.

6. Chain may be placed in block in a few minutes by any handy man.

7. Remove oval pin by releasing bolt and inserting new chain; replace OVAL BOLT in nut; peen thread of bolt lightly to prevent backing off.



FORD TRIBLOC
"—familiarity has bred *respect*. Back of his strong arm is a mighty one of steel, which takes this strength and makes a plaything of the task.
